MODULAR GREEN ROOF SYSTEM

Sustainable. Scalable. Smart

Transform rooftops into vibrant green

Why Choose Our Modular Green Roof System?

1. **Easy Installation :** Pre-planted trays snap into place for fast, tool-free set-up. Ideal for both new builds and retro-fits.

2. **Light Weight & Roof Friendly :** Engineered for structural safety with integrated root barriers and water-proofing.

3. **Efficient Drainage :** Built-in drainage channels prevent water pooling and reduce runoff.

4. **Low Maintenance :** Uses drought-tolerant plants like sedum that require little watering or care.

5. **Eco Friendly :** Improves insulation, reduces urban heat, and supports local biodiversity.

6. **Flexible Design :** Modular trays make it easy to expand, reconfigure, or remove sections as needed.

Technical Specification:

Material : High- density recycled and UV rays-stable Polypropylene(PP-HD)

Dimension :
500x500x100mm

Wight : 1 Kg / Module

Colour : Black

Packing: Single use
pallet 20Nos (5 SqMtr)

Biological / Chemical Resistant: Inert

Application :

Commercial rooftops

Residential terraces

Schools and institutions

Parking structures

Public buildings

KEY BENEFITS

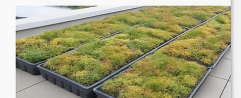

MODULAR GREEN ROOF SYSTEMS

- ✓ Easy to install and remove
- ✓ Lightweight design
- ✓ Good drainage
- ✓ Low maintenance
- ✓ Cost-effective
- ✓ Flexible and scalable

GREEN ROOF SYSTEM

EASY INSTALLATION & REMOVAL

- Easy install, Removable

ADVANTAGES

EASY INSTALLATION & REMOVAL

- Easy for install, removed

GOOD DRAINAGE

- Avoid overflowage

LIGHTWEIGHT & ROOF-FRIENDLY

- Local for loading

ADVANTAGES

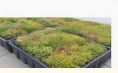

FLEXIBLE & SCALABLE

- Reduced labor and structural costs

COST-EFFECTIVE

- Reduced labor and structural costs

ECO-FRIENDLY

- Insulation, bioret
